# Olive

# Flounder

# (Hirameh)

**Paralichthys Olivaceus is one of the highest valued finfish in the world. It became important aquaculture species due to high growth rate, feed efficiency, tolerance to water temperature changes and resistance to diseases. It grows up to about 1 meter long and 10 kg. Olive flounder can be used for any cooking application but they are highly esteemed for use as sushi and best for sashimi.**

# Dry Cyst Artemia

**Revive Artemia is produced in a state of the art farm in Russia.**

**Revive Artemia meets the highest standard of the industry. It is available for sale in Turkey and EU territory by VARS Aquaculture Company and in the USA and Canda by our partners.**

**Revive Artemia is carefully dried by spray drying technique, which increases the life span of our product. Revive Artemia can survive in dried form for at least 3 years with full preservation of nutritional values.**

**Revive Artemia with a high protein rate (54.57%) is the best feed for larvae, juvenile fish, and broodstock. Artemia-fed fish grow at a faster pace and proved to have a higher fertility rate.**

**Revive Artemia is a perfect choice for saltwater and freshwater aquariums.**

# Fresh Chlorella V12

**Super Fresh Chlorella V12 has been developed, especially for Rotifer cultivation. Each cell of SV12 contains DHA, EPA, and vitamin B12 ensuring optimal enrichment.**

**SV12 fresh Chlorella is coming to you directly from the state of the art facility in Japan. SV12 meets the highest standards of the industry and can increase the number of Rotifers 8 times in 3 days.**

**SV12 was not dried or frozen. SV12 is a FRESH product.**

---

# Fresh Chlorella V12

## Features:

- SV12 is a highly condensed solution of live Chlorella cells.
- SV12 contains vitamin B12, a necessary vitamin for Rotifer growth, assuring a healthy and highly stable Rotifer production.
- SV12 can reduce labor and production costs and is suitable for both high and low-density Rotifer cultivation.
- SV12 disperses readily in the Rotifer tank.
- Rotifers fed with SV12 require a smaller amount of feed.
- SV12 will not affect the temperature of the tank water.
